

# LIGHT BOARD CREATIVES

In order to draw these story images in your Bible, you must be using a Journaling Bible. These Bibles have the margins to the side to write or draw in.

Do not feel you need to use every single story image. Pick and choose which times you'll use an image versus when you fill up your page with stickers, or even stenciling, in the column, any verses that jump out to you.

In these images, you'll have several to choose from ranging from a more complex to a simpler drawing style. I did not start story imaging until chapter 4 so my pictures in the beginning do not show any.

Very affordable and simple light boards can be purchased on Amazon for as low as \$20, at the time of this writing.

Cut out your image.

Place your story image on your light board.

Place the light board, with the story image, behind the Bible page you're wishing to color on.

Line it up and trace.

If this were a sandwich it would be:

Light board

Story Image

Bible Page

**IMPORTANT:** You will want to SKIP coloring in the images until you are certain the back side of the next Bible page is drawn. The light board will make the colored image on the back of your page interfere with next current page. It will be harder to trace when there is color on the other image.

Remember, this is for you alone. It doesn't have to be perfect. Just memorable for you, and FUN!

And if there are no images suitable for your taste, just do some google searching and find

**NOTE:** These images are from simple google searches, which is why the download is included for free for copyright purposes. Compiling this list, I am not claiming any rights to any images used. I have done simple edits of "lightened" & "contrasted" the images where they would be more visible for a tracing purpose. I have attributed rights to the owner where applicable and where I was able.

No profit is or will be collected from any images provided. Images provided for teaching and learning.
